

Constructing an Argument

Instructions: You have examined and collected data on different causes of climate change, including causes of Earth's past and present day trends. Construct an argument that addresses the question below.

Question: Based on the investigations and modeling you have conducted, what do you believe is the most likely cause of current changes in Earth's climate?

Claim

Using only one or two sentences, state your claim.

Evidence

What evidence supports your claim? (List relevant data.)

Reasoning

How do the data support or refute the claim you are making about the cause of current climate changes?
