

Invasive Species in Your Community

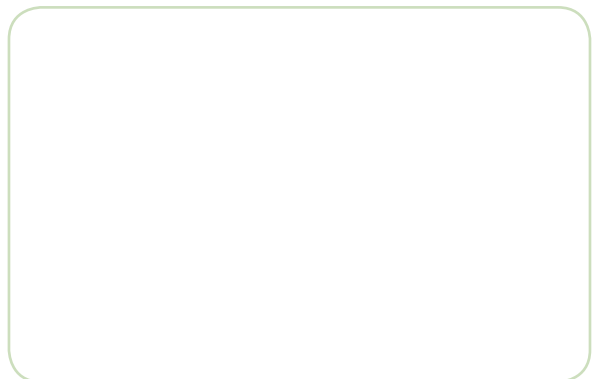

Use the Internet or books to learn about an invasive species in your state. Answer the following questions about the species. Then, create a way to present this information to your classmates.

1 Invasive species: _____

2 Where did this invasive species come from?

3 How did it get to your state?

4 Where in the United States does it live? Include a map that shows where this species lives.

Invasive Species in Your Community

5 What problems does it cause in the local ecosystem? How does it affect the transfer of energy in the local ecosystem?

6 What can people do to get rid of it or keep it from spreading (please include only environmentally friendly suggestions)?

7 Where did you find your information for this project?
